Subject: CBECC-Res 2013 v3b1 compliance software now available

Dear CBECC-Res user:

CBECC-Res 2013 v3b1 compliance software is now available for download from the project website: www.bwilcox.com/BEES/BEES.html. This update to Version 3 was approved by the California Energy Commission on December 24, 2014.

The following changes have been implemented since CBECC-Res 2013 3b:

CBECC-Res v3b1:

1. Fixed a bug that caused incorrect attic vent areas with multiple attic zones.
2. Fixed a bug that caused incorrect ceiling air leakage with multiple ceiling surfaces.
3. Corrected the treatment of existing and altered HVAC and duct systems.
4. Provided new versions of all the example files to eliminate legacy errors.
5. Fixed a number of crashes, interface operation problems and reporting issues.
6. Allow the use of all distribution types in multi-family units with individual domestic hot water heating systems.

The following are known limitations in v3b1:

1. Duplexes and town homes need to be modelled as multiple single family homes
2. Sealed attics will not be enabled until the CEC establishes and documents the physical criteria for this construction type.
3. If multi-family dwelling units have individual water heating rather than a central DHW system, there is a limit of 100 DHW systems.

If you need help with the software, please check the CBECC-Res FAQs, Quick Start Guide and User Manual, which can all be downloaded from the [project website](#). The Quick Start Guide and User Manual can also be accessed by clicking on the program's Help menu.

If you need additional technical assistance with the software, please email CBECC-Res Support at cbecc.res@gmail.com.

Best Regards,

Todd Ferris
