Subject: CBECC-Res 2013 Version 4 now available

Dear CBECC-Res user:

Version 4 of the CBECC-Res 2013 compliance software is now available for [download from the project website](#). New features include:

- Improved compliance processing speed — almost twice as fast as Version 3c for typical projects
- Dedicated boilers for hydronic space heating
- Refrigerant charge test for ductless (mini-split) heat pumps
- Notes for documentation and notes to be printed on the CF1R
- Insulated roof tile systems by Green Hybrid Roofing
- Ducts located in specific attics

Version 4 also corrects several software bugs and reporting errors primarily relating to:

- Addition and Alteration modeling and HERS reporting issues
- HERS reporting errors for mini-splits and for ductwork under certain conditions
- Water heating assumptions for a ground source heat pumps

Version 4 was approved by the Energy Commission this week. **All permit applications made on or after August 1, 2015 must use CBECC-Res 2013 Version 4.**

If you need general help with the software, please check the CBECC-Res FAQs, Quick Start Guide and User Manual, which can all be downloaded from the [project website](#). The Quick Start Guide and User Manual can also be accessed by clicking on the program's Help menu. If you need additional technical assistance with the software, please email CBECC-Res Support at cbecc.res@gmail.com (if you send an .ribd file, please mention the CBECC-Res version number).
